"... a detailed, practical guide for mediating the wrenching, often life-and-death disputes that can arise among health care providers, their patients, and their patients' families."

—Margaret L. Shaw, ADR Associates, LLC

An essential guide to resolving the highly-charged medical care dilemmas so prevalent in health care today.

Review it RISK-FREE for 30 days!

"... the first book-length exposition on what the American Society of Bioethics and Humanities Task Force on Standards for Bioethics Consultation meant by its call for ethics facilitation . . . In addition to a spirited theoretical defense of 'bioethics mediation,' the authors present a detailed practical model for HOW to do bioethics mediation. The steps are clearly laid out, using examples that come from their extensive experience . . ."

—Robert M. Arnold, MD, University of Pittsburgh Medical Center

Without Compromise

Bioethics Mediation: A Guide to Shaping Shared Solutions

Nancy Neveloff Dubler and Carol B. Liebman

This compelling book describes a new approach for resolving the medical care disputes entangling patients, family members, physicians, and other health care professionals today.

Bioethics Mediation: A Guide to Shaping Shared Solutions argues that mediation is the most effective strategy for resolving disputes in health care settings. It explains the theory and then provides real-world case studies and analyses demonstrating the how-to's of effective bioethics mediation. It also explains:

- how bioethics mediation differs from both traditional mediation and traditional bioethics consultation
- what bioethics mediators need to know
- how to implement a mediation program in a hospital or other health care setting.

Bioethics committees, consultants, and anyone involved in complex medical cases will find **Bioethics Mediation: A Guide to Shaping Shared Solutions** a key resource for reaching mutually satisfactory solutions.

2004/256 pages/softcover/#1-881277-70-4 \$39.95
